DETAILED ACTION

Reasons for Allowance

1. Claims 1-34 are allowed.

2. Examiner's Statement of Reasons for Allowance:

Applicant's invention relates to a voltage regulator for a permanent magnet alternator, and more specifically, to a voltage regulator with temperature cut-off.

The system has a permanent magnet alternator, a battery and a voltage regulator. The voltage regulator has operatively connected semiconductor switch, which turns voltage regulation on or off based on a predetermined temperature threshold.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant's invention differs from the prior art of record by its circuit configuration, which was interpreted by the examiner as shown on the drawings and disclosed in the specification, which performs switching on and off of the voltage regulator based on temperature threshold, as disclosed and claimed, and which examiner's search failed to find.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2834
